Overflow and pressure control valves made of stainless steel, in angle type or with rotatable angle housing, with threaded connections or high-pressure connections

### ■ SUITABLE FOR

Liquids	neutral and non-neutral	
Air, gases and vapours	neutral and non-neutral	
Steam		

### ■ EXAMPLES OF USE

For the protection of:

- Overload protection of pumps in closed circuits for neutral/non-neutral, non-sticking liquids

For control in:

- Pressure systems for neutral/non-neutral gases and vapours and – depending on the seal – also for steam
- Pressure systems for technical gases such as hydrogen
- test rig construction
- mechanical engineering and process equipment construction
- shipbuilding industry and marine equipment
- secondary areas in the food-, beverage-, pharmaceutical- and cosmetics-industries

Series 493 ■ VALVE VERSION

<b>t (BI)</b>	gastight version of spring housing	for neutral and non-neutral media without counter pressure. The environment is protected from being affected by the medium
<b>k (BIII)</b>	pressure compensated piston	for neutral and non-neutral an particularly for flammable, toxic and environmentally hazardous media and/or counter pressure up to 500 bar. Spring, moving parts and the environment are protected from being affected by the medium. The piston design allows for a temperature range of -10°C to 150°C.

Valves can be delivered unset within a pressure range or set and sealed at the factory.

■ MEDIUM

<b>GF</b>	gaseous and liquid	Air, vapours, gases, liquids and - depending on safety valve version and seal - also for steam
