#### Series 9000:

Dimensioning by pressure loss on the outlet pressure side

# Flow chart water

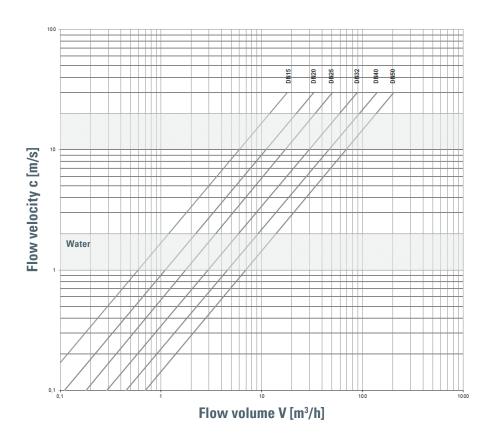

Pressure drop delta p [bar]

Dimensioning by flow velocity

# For liquids:

With help of the chart you can determine the nominal diameter (DN) for a given flow volume V (m³/h). According to DVGW-guidelines (DIN 1988) a flow velocity of 2 m/s in domestic water supply systems should not be exceeded.
